

Environmental Information for the Green Mountain Energy® Electricity Products  
Electricity supplies from July 1, 2002 through June 30, 2003

Electricity can be generated in a number of ways with different impacts on the environment. The standardized environmental information shown below allows you to compare this electricity product with electricity products offered by other electric suppliers.

Energy Source	Eco Smart-OLD		Eco Smart-NEW		Enviro Blend		2002 EGRID EPA
	What we promised	What we delivered	What we promised	What we delivered	What we promised	What we delivered	PJM power
Coal	0%	0%	0%	0%	0%	0%	45%
Gas	49%	44%	0%	0%	0%	0%	9%
Hydroelectric (large)	50%	52%	95%	95%	50%	44%	<1%
Nuclear	0%	0%	0%	0%	0%	0%	40%
Oil	0%	0%	0%	0%	0%	0%	3%
Renewable Energy	1%	4%	0%	0%	50%	56%	<1%

Total	100%	100%	100%	100%	100%	100%	100%

Air Emissions

The amount of air pollution associated with the generation of the electricity product is shown. This amount is compared to a New Jersey benchmark. The benchmark approximates the average emission rate for all electricity generation in New Jersey.

Energy Conservation

Avoided Generation = 0  
Avoided Air Emissions = 0 tons CO<sub>2</sub>  
0 tons NO<sub>x</sub>  
0 tons SO<sub>2</sub>

See your Terms of Service for further information regarding this label. You may also call Green Mountain Energy Company for additional information or a copy of the Terms of Service at (800) 286-5856.

<sup>1</sup> Data for EcoSmart-Old product is for the period 1/1/02 through 12/31/02 the most recent 12 month period for which data is available. This product was discontinued as of December 2002.

<sup>2</sup> Data of EcoSmart-New product is for the period 1/1/03 through 6/30/03. This product replaced the previous Eco-Smart product and 12 months of data is not yet available.

Customers who choose Green Mountain Energy® electricity will not have electricity from a specific generating facility delivered directly to their homes, but they are able to support generators of the energy resources included in their Green Mountain Energy blend in an amount equal to their annual electricity purchases.

The power blend information provided describes the purchases of *Green Mountain Energy* products over the course of a calendar year. For each calendar year or portion thereof that a customer purchases *Green Mountain Energy* electricity, we will deliver to that grid enough power from our energy blend resources to match that customer's energy purchases during that period.

Renewable and hydroelectric resource availability varies from hour to hour and from season to season, as does our customers' use. At any specific time, we will be putting more or less of these energy sources into the grid than our customers use. We will put system power into the grid to serve our customers' minute-by-minute consumption but will ensure that electricity from the promised resources equal to your annual electricity usage for which you've paid is delivered to your regional grid. At all times our customers' electricity needs will be served.

The Green-e Program certifies that EnviroBlend product meets the minimum environmental and consumer protection standards established by the non-profit Center for Resource Solutions. For more information on Green-e certification requirements, call 1-888-63 GREEN or log on to [www.green-e.org](http://www.green-e.org).
